

Alcatel Omni PCX Office correct shutdown procedure.

Note that it is important that the Alcatel Omni PCX Office is correctly shutdown if it's necessary to restart the system, failure to correctly shutdown may result in system program corruption.

UNDER NO CIRCUMSTANCES SHOULD YOU UNPLUG THE POWER FROM THE REAR OF THE PABX.

The correct shutdown procedure is as follows.

1. When the system is on the button will be indented, off it will be flush with the front.
2. Press the power button in and release, the POWER LED WILL CHANGE FROM GREEN TO FLASHING RED while the system shuts down.
3. Once the power LED is SOLID RED wait 30 seconds then press the power button again to restart the system.

Note that switching the power off at the power outlet won't shut the system down, the PABX's internal battery backup will keep the system running for a short time and eventually shut the system down when the battery's capacity reaches a critical level.
